Crochet Mini Santa-Hat Keychain

Keychain · 1 part(s) + 0 finishing operation(s) · hooks 2.5 mm

Concept illustration — not a render of this pattern. It is not generated from these stitch counts and may show colours, parts or finishes the instructions do not produce.

A 15-round mini hat worked from the tip down in red, with a white glitter brim, folded and finished with a pompom on a keychain clip.

Provenance

Row wording transcribed from the written pattern you supplied; the framework added no instruction that is not in it. The work direction (tip down) is inferred from your own row order and is marked as such.

Tally of instruction lines: **15** quoted from your source, **0** inferred, **0** added by the framework. Lines that are not yours carry an [INFERRED] or [ADDED] tag where they appear.

Materials

Yarn: 5-ply, 50% cotton / 50% acrylic, medium thickness
Hooks: 2.5 mm
Colours: red, white (or silver glitter)
Notions: keychain clip, small pompom, glue, scissors

Abbreviations

ch = Chain
sc = Single crochet
sl st = Slip stitch
magic ring = Ring of adjustable loops worked over first (MR)
x = 1 single crochet
v = 2 single crochets in the top of the next stitch (increase)

Gauge & finished dimensions

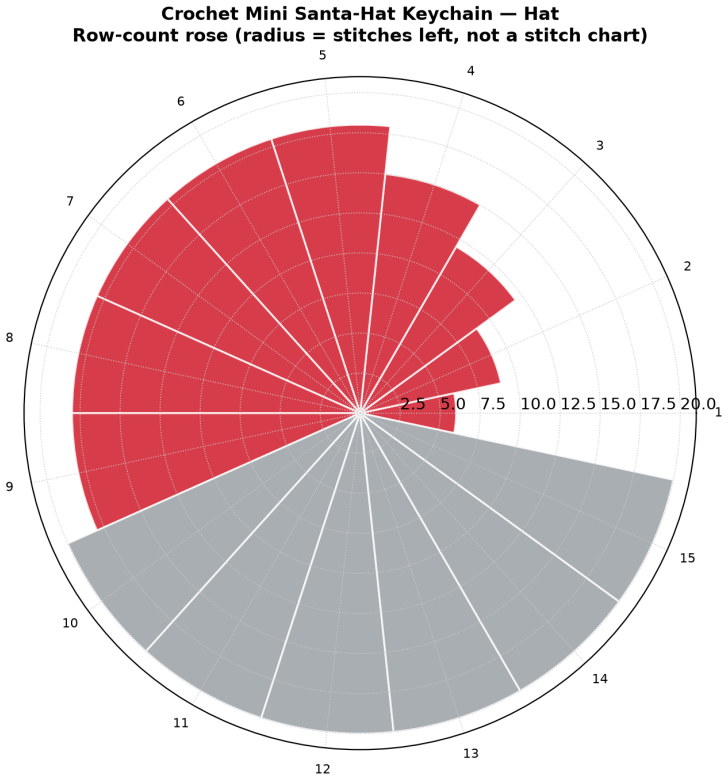

Gauge: 30.0 sts x 36.0 rows / 10 cm (**NOT MEASURED** — no swatch was attested, so every centimetre here is illustrative).
Widest diameter: ~2.12 cm (1.91–2.33 cm), from the widest round's circumference.
Worked height: ~4.17 cm (3.75–4.59 cm) — rows × row gauge, i.e. how tall the piece is as worked, not a 3D measurement.

ASSUMED gauge. You gave yarn and hook but no swatch, and no swatch means no measured size. 30 sts x 36 rows / 10 cm is a typical tight-tension amigurumi gauge on 2.5 mm with 5-ply, so treat every centimetre below as illustrative. Work a 10 x 10 cm swatch, count it, and re-run to make these exact.

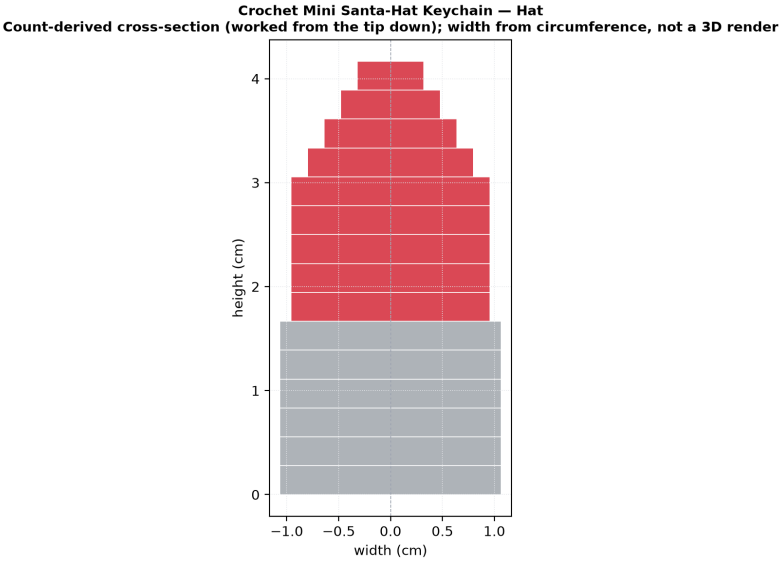

Yarn usage (estimate)

red: 132 sc, ~1.61 m, ~0.50 g **white (or silver glitter)**: 120 sc, ~1.47 m, ~0.46 g
Total 252 sc, ~3.08 m, ~0.96 g. Heuristic; varies with tension. Covers the stitch-checked parts only.

Count charts & cross-section

Counts per row, engine-verified. A count chart, not a stitch chart: it shows how many stitches a row leaves, not where they sit or what shape the piece makes.

Pattern: parts

Hat

- Worked from the tip down (inferred from your own wording: the last rows are the brim you fold, and row 1 is the ring at the top).

Row 1: Leave some string. Make a magic ring. 1 ch. Make 6 single crochets into the ring. Complete the row by making a sl st at the top of the single crochet. **[6 sts]** // red

Row 2: 1 ch. Starting from the top of the loop where you made the sl st, make 1 sc side by side, 2 sc in the top of the next stitch; repeat this until the end of the row, making a total of 9 sc. (1x, v sc) Complete the row by making a sl st at the top of the first sc. **[9 sts]** // red

Row 3: 1 ch. Starting from the top of the loop where you made the sl st, make 2 sc side by side, 2 sc in the top of the next stitch; repeat this until the end of the row, making a total of 12 sc. (2x, v sc) Complete the row by making a sl st at the top of the first sc. **[12 sts]** // red

Row 4: 1 ch. Starting from the top of the loop where you made the sl st, make 3 sc side by side, 2 sc in the top of the next stitch; repeat this until the end of the row, making a total of 15 sc. (3x, v sc) Complete the row by making a sl st at the top of the first sc. **[15 sts]** // red

Row 5: 1 ch. Starting from the top of the loop where you made the sl st, make 4 sc side by side, 2 sc in the top of the next stitch; repeat this until the end of the row, making a total of 18 sc. (4x, v sc) Complete the row by making a sl st at the top of the first sc. **[18 sts]** // red

- At this stage you can attach the keychain clip.
- Make sure that the points where you made the slip stitches are on the back side.

Row 6: 1 ch. Starting from the top of the loop where you made the sl st, make 18 sc side by side. Complete the row by making a sl st at the top of the first sc. **[18 sts]** // red

Row 7: 1 ch. Starting from the top of the loop where you made the sl st, make 18 sc side by side. Complete the row by making a sl st at the top of the first sc. **[18 sts]** // red

Row 8: 1 ch. Starting from the top of the loop where you made the sl st, make 18 sc side by side. Complete the row by making a sl st at the top of the first sc. **[18 sts]** // red

Row 9: 1 ch. Starting from the top of the loop where you made the sl st, make 18 sc side by side. Complete the row by making a sl st at the top of the first sc. **[18 sts]** // red

- Switch to 2nd colour while making a sl st at the top of the first sc.

Row 10: 1 ch. Starting from the top of the loop where you made the sl st, make 8 sc side by side, 2 sc in the top of the next stitch; repeat this until the end of the row, making a total of 20 sc. (8x, v sc) Complete the row by making a sl st at the top of the first sc. **[20 sts]** // white (or silver glitter)

- Made 6 rows with glittery silver yarn for a glitter touch (otherwise use white yarn).

Row 11: 1 ch. Starting from the top of the loop where you made the sl st, make 20 sc side by side. Complete the row by making a sl st at the top of the first sc. **[20 sts]** // white (or silver glitter)

Row 12: 1 ch. Starting from the top of the loop where you made the sl st, make 20 sc side by side. Complete the row by making a sl st at the top of the first sc. **[20 sts]** // white (or silver glitter)

Row 13: 1 ch. Starting from the top of the loop where you made the sl st, make 20 sc side by side. Complete the row by making a sl st at the top of the first sc. **[20 sts]** // white (or silver glitter)

Row 14: 1 ch. Starting from the top of the loop where you made the sl st, make 20 sc side by side. Complete the row by making a sl st at the top of the first sc. **[20 sts]** // white (or silver glitter)

Row 15: 1 ch. Starting from the top of the loop where you made the sl st, make 20 sc side by side. Complete the row by making a sl st at the top of the first sc. **[20 sts]** // white (or silver glitter)

- Cut the thread and make a secret join from the top of the first loop. Fold the white rows for a hat-type look. Stick a small pompom with glue on the top of the hat.

Verification

Arithmetic: PASS — 0 stitch-math error(s) across 15 audited rows. Every count was re-derived from the operations and compared with the stated total.
Coverage: 252 stitches counted across Hat. All parts are stitch-modelled (100%).
Fidelity to source: see the Provenance tally — lines the framework wrote are tagged where they appear. A green arithmetic verdict still does not certify that this is the pattern you asked for.

Verification appendix — engine audit

Internal working, not part of the instructions: every row the engine re-derived, and what it reconciled.

Component	Row	Inst	Base sts	Start	Consumed	Created	Declared	Status
