Crochet Star Hanging Ornament

Hanging Ornament · 4 part(s) + 3 finishing operation(s) · hooks 1.0 mm, 3.5 mm

Concept illustration — not a render of this pattern. It is not generated from these stitch counts and may show colours, parts or finishes the instructions do not produce.

A stuffed star hanging ornament made from two 5-pointed stars sewn together, decorated with flowers, cherries and blush, with eyes and a smile and a chain hanging loop.

Provenance

Instruction wording is transcribed from the pattern text you supplied (Materials, Abbreviations, Star Base, Star Points, Sewing, Flowers, Cherry, Blush, Assembly, Hanging). Where the framework wrote or widened a line, that line carries an ADDED or INFERRED tag next to it -- see the provenance tally below and the Open questions list for the gaps the source leaves.

Tally of instruction lines: **47** quoted from your source, **4** inferred, **10** added by the framework. Lines that are not yours carry an [INFERRED] or [ADDED] tag where they appear.

Materials

Yarn: Acrylic yarn (3-ply and 2-ply)
Hooks: 1.0 mm, 3.5 mm
Colours: not stated in the source (choose yours)
Notions: scissors, glue, yarn needle, fiber filling

Hook assignment: Star: 3.5 mm (inferred); Flower: 1.0 mm (inferred); Cherry: 1.0 mm (inferred); Blush: 1.0 mm (inferred)

Abbreviations

MR = Magic ring
sl knot = Slip knot
sc = Single crochet
inc = Increase
sk = Skip
ch = Chain

sl st = Slip stitch
dc = Double crochet

Gauge & finished dimensions

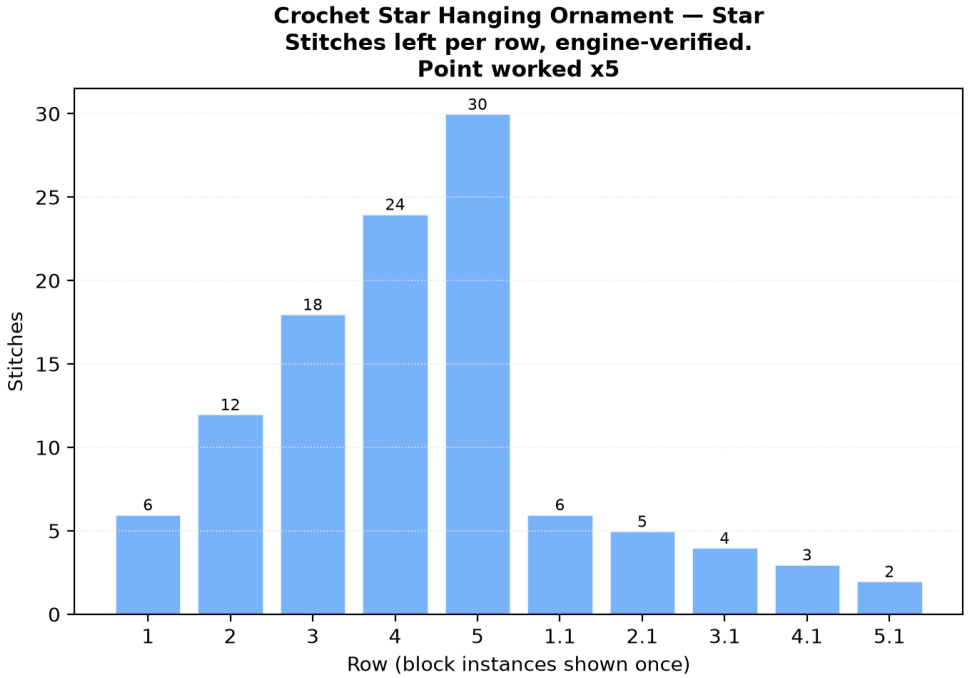

No gauge was supplied for this item, so **no finished size is claimed**. A stitch gauge is the only thing that converts stitch counts into centimetres, and inventing one would fabricate the size along with it.

To get exact dimensions: work a 10 × 10 cm swatch in sc on the hook listed above, count its stitches and rows, and re-run the pattern with that gauge.

Open questions — gaps in the source

· puffy stitch (loop count and height not given in the source) -- used by the source but never defined
· Open question: Materials list 3-ply and 2-ply yarn but never says which ply belongs to which part. The hooks are assigned (3.5 mm for the star, 1.0 mm for the appliqué); the ply pairing is a guess, so it is left to you -- 3-ply on 3.5 mm and 2-ply on 1.0 mm is the usual matching, not the source's instruction.
· Open question: which hook for which part is also inferred, not stated. Your Materials say '1 mm and 3.5 mm hooks' and never name a part; the assignment is printed as inferred because a 1.0 mm hook cannot make this star and a 3.5 mm hook cannot make a 5-petal flower.
· Open question: 'puffy stitch' is used but never defined in the source -- no loop count, no height. It cannot be counted or drawn until you say which puff you mean (a 3-loop puff and a 5-loop puff are different sizes).
· Open question: the materials list does not include the eyes used here. The source says 'glue the eyes' but never lists them or their type -- choose them, or embroider the eyes in black yarn.

Count charts

Counts per row, engine-verified. A count chart, not a stitch chart: it shows how many stitches a row leaves, not where they sit or what shape the piece makes.

Pattern: parts

Star (make 2) — hook 3.5 mm (inferred)

- Make another star following the same pattern.
- Open question: Materials list 3-ply and 2-ply yarn but never says which ply belongs to which part. The hooks are assigned (3.5 mm for the star, 1.0 mm for the appliqué); the ply pairing is a guess, so it is left to you -- 3-ply on 3.5 mm and 2-ply on 1.0 mm is the usual matching, not the source's instruction.
- Open question: which hook for which part is also inferred, not stated. Your Materials say '1 mm and 3.5 mm hooks' and never name a part; the assignment is printed as inferred because a 1.0 mm hook cannot make this star and a 3.5 mm hook cannot make a 5-petal flower.

Row 1 — Base row 1: Make a MR. Make 6 sc into the MR (no sl st). **[6 sts]**
Row 2 — Base row 2: Make an inc in every single stitch (12 sc). **[12 sts]**
Row 3 — Base row 3: Repeat (1 sc, 1 inc) 6 times (18 sc). **[18 sts]**
Row 4 — Base row 4: Repeat (2 sc, 1 inc) 6 times (24 sc). **[24 sts]**
Row 5 — Base row 5: Repeat (3 sc, 1 inc) 6 times (30 sc). **[30 sts]**

Point 1 -- base sts 1-6

Row 1: 6 sc, ch 1, turn your work. **[6 sts]**
Row 2: Sk the first stitch and make 5 sc, ch 1, turn your work. **[5 sts]**
Row 3: Sk the first stitch and make 4 sc, ch 1, turn your work. **[4 sts]**
Row 4: Sk the first stitch and make 3 sc, ch 1, turn your work. **[3 sts]**
Row 5: Sk the first stitch and make 2 sc, ch 1, fasten off. **[2 sts]**

Point 2 -- base sts 7-12 — join the yarn to these stitches

Row 1: 6 sc, ch 1, turn your work. **[6 sts]**
Row 2: Sk the first stitch and make 5 sc, ch 1, turn your work. **[5 sts]**
Row 3: Sk the first stitch and make 4 sc, ch 1, turn your work. **[4 sts]**
Row 4: Sk the first stitch and make 3 sc, ch 1, turn your work. **[3 sts]**
Row 5: Sk the first stitch and make 2 sc, ch 1, fasten off. **[2 sts]**

Point 3 -- base sts 13-18 — join the yarn to these stitches

Row 1: 6 sc, ch 1, turn your work. **[6 sts]**
Row 2: Sk the first stitch and make 5 sc, ch 1, turn your work. **[5 sts]**
Row 3: Sk the first stitch and make 4 sc, ch 1, turn your work. **[4 sts]**
Row 4: Sk the first stitch and make 3 sc, ch 1, turn your work. **[3 sts]**
Row 5: Sk the first stitch and make 2 sc, ch 1, fasten off. **[2 sts]**

Point 4 -- base sts 19-24 — join the yarn to these stitches

Row 1: 6 sc, ch 1, turn your work. **[6 sts]**
Row 2: Sk the first stitch and make 5 sc, ch 1, turn your work. **[5 sts]**
Row 3: Sk the first stitch and make 4 sc, ch 1, turn your work. **[4 sts]**
Row 4: Sk the first stitch and make 3 sc, ch 1, turn your work. **[3 sts]**
Row 5: Sk the first stitch and make 2 sc, ch 1, fasten off. **[2 sts]**

Point 5 -- base sts 25-30 — join the yarn to these stitches

Row 1: 6 sc, ch 1, turn your work. **[6 sts]**
Row 2: Sk the first stitch and make 5 sc, ch 1, turn your work. **[5 sts]**
Row 3: Sk the first stitch and make 4 sc, ch 1, turn your work. **[4 sts]**
Row 4: Sk the first stitch and make 3 sc, ch 1, turn your work. **[3 sts]**
Row 5: Sk the first stitch and make 2 sc, ch 1, fasten off. **[2 sts]**

Flower (make 2) — hook 1.0 mm (inferred)

- Make a MR and ch 2.
- Make 1 dc into the MR, ch 2, sl st into the MR.

- Repeat the pattern for 4 more times.
- Close the MR and cut the yarn.
- Make another flower following the same pattern.
- If you mean to sew the flowers on instead of gluing them, leave a tail long enough to bury when you cut. [ADDED]

  why: Your source cuts the yarn and glues; this only matters if you switch to sewing.

Cherry (make 3) — hook 1.0 mm (inferred)

■ Open question: 'puffy stitch' is used but never defined in the source -- no loop count, no height. It cannot be counted or drawn until you say which puff you mean (a 3-loop puff and a 5-loop puff are different sizes).

- Make a sl knot and ch 2.
- Sk the first ch and make a puffy stitch into the second ch.
- Ch 1 and tie the threads tightly.
- Make 2 more cherries following the same pattern.

Blush (make 2) — hook 1.0 mm (inferred)

■ Make 1 more blush.

Row 1: Make a MR. Make 5 sc into the MR. Close the MR and sl st. **[5 sts]**

Pattern: finishing operations

Sewing

■ This seam is worked entirely with yarn and a needle. No glue is used anywhere in it; glue appears in the materials only for the surface decoration.

- Join two stars together and sew them together, stopping near the end.
- Add filling and then sew completely.
- Place the two stars with their right sides facing out and their wrong sides together inside, lining up the flat bases and all 5 points tip to tip. [ADDED]

  why: The source doesn't say how the two faces are stacked. This orientation is the one the seam below needs; the opposite pairing would leave the ornament inside-out.
- Thread the yarn needle with about 70 cm of the same yarn. [ADDED]

  why: A working length, not a figure from your source.
- Bring the needle up between the layers at the base of one point so the starting knot is hidden inside. [ADDED]
- Sew around with an invisible slip-stitch seam: pick up one front loop on the star in front and one back loop on the star behind, pull the yarn through, and repeat one seam stitch per crochet stitch. [ADDED]
- At each of the 5 tips take two stitches into the same space so the point turns sharp instead of rounding off. [ADDED]
- Stop with about 4 cm of the last point left open. Fasten off temporarily. [ADDED]

  why: This is your 'stopping near the end', made measurable.
- Push small pieces of fiber filling through the opening, working them into each point with the back of a hook so the tips fill without bulging the seam. [ADDED]

  why: Expands your 'Add filling'.
- Close the opening with the same invisible seam, matching stitch for stitch. Pull the yarn tight, pass the needle through the star and out the other side, and cut so the tail disappears inside. [ADDED]

  why: Expands your 'then sew completely'.

Assembly

■ Open question: the materials list does not include the eyes used here. The source says 'glue the eyes' but never lists them or their type -- choose them, or embroider the eyes in black yarn.

■ Added guidance, not your instruction: glue holds surface decoration, but a sewn-on flower survives being handled far better. Sew if this is for a child.

- Glue the flowers, cherries and blush accordingly.
- Glue the eyes in the middle.
- Cut a small piece of black or brown yarn and glue it in the middle to look like a smile.

Hanging

- Make a sl knot and ch 20, then cut the yarn.
- Insert it onto the top of the star to make a hanging.
- Sew the loop into the top seam with two stitches on the inside and bury the tail there. [ADDED]

  why: 'Insert it onto the top' cannot carry weight; a knotted loop pulled against a stitch hole tears. That fixing is a recommendation, not the source's instruction.

Verification

Arithmetic: PASS — 0 stitch-math error(s) across 31 audited rows. Every count was re-derived from the operations and compared with the stated total.
Multiplicity: Star / Point x5 — 5 × 6 base sts = 30, foundation made 30. OK
Coverage: 390 stitches counted across Star x2, Blush x2. **Not stitch-modelled (50% of parts):** Flower x2 (described, no counts), Cherry x3 (described, no counts) — described steps the arithmetic above does not prove.
Finishing operations described in words, not counted: Sewing, Assembly, Hanging.
Fidelity to source: see the Provenance tally — lines the framework wrote are tagged where they appear. A green arithmetic verdict still does not certify that this is the pattern you asked for.

Verification appendix — engine audit

Internal working, not part of the instructions: every row the engine re-derived, and what it reconciled.
